-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, and 15-17, drawn to nonwoven web, classified in class 442 in various subclasses.
  - II. Claims 10-14, drawn to the formation of the nonwoven, classified in class 8 in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the foam or binder could be coated onto the individual fibers (coated fibers) or the foam/binder could be present and the tangled web could be air blown onto the foam/binder and then heat set.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Ms. Melissa Hayworth on 04/07/05 a provisional election was made without traverse to prosecute the invention of Group 1, claims 1-9 and 15-17. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Specification***

5. The use of the trademarks (RYTON™) has been noted in this application. It should be capitalized (ALL CAPS) wherever it appears and be accompanied by the generic terminology and appropriate symbol.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-9 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,830,656 issued to Kinsley JR. in view of Watkins USPN 5,085,938.

8. Kinsley discloses inventing a nonwoven web comprised of metal or refractory fibers. The fibers can be ceramic, carbon, zinc, nickel or stainless steel (column 3). In column 7, Patentee teaches that their composite can be used to make filters, fuel cells and electrodes. The only limitation not suggested by Kinsley is the use of poly(phenylene sulfide) as the binder.

9. Watkins teaches using poly(phenylene sulfide) as a binder in fiber reinforced composites. A person having ordinary skill in the art at the time the invention was made would have found it obvious to have employed the poly(phenylene sulfide) binder of Watkins

in the composite of Kinsley, motivated by the reasoned expectation of having a composite with good long term heat stability.
